

About the Clinical Linkage Activity Form

What is the purpose of the Clinical Linkage Activity Form?

The Clinical Linkage Activity Form is an important part of the evaluation of the Department of Health Services' Teen Pregnancy Prevention (TPP) Programs, as well as the Family PACT evaluation, which are both being conducted by the University of California, San Francisco (UCSF). The California FY 2003/04 Budget Trailer Bill, (AB 1762) mandates that clinical linkages be established and implemented among the DHS TPP programs. This form will help document the extent to which TPP programs have established such linkages.

Who should complete the form?

The CCG/I&E/MIP coordinator or other staff person who is most knowledgeable about the types of CCG/I&E/MIP program activities being implemented, as well as the number of individuals participating in these activities.

When should the form be completed?

Please complete one form for each quarter and submit it to your OFP consultant and your evaluation liaison along with your CCG/I&E/MIP progress report or update.

How should the form be completed?

For this quarter and year to date, complete the 3 questions:

- Question 1.**
- Mark with an "X" each CCG/I&E/MIP activity implemented where information about Family PACT services was addressed, either orally or in written format.
 - Add all Xs to complete the "Total number of activities where Family PACT services were discussed".
- Question 2.**
- List the total number of participants *informed* about Family PACT services during all your CCG/I&E/MIP activities, by gender.
 - List the total number of participants *referred* to a Family PACT provider, by gender. *Referred to* is defined as directing (providing a phone number, address, making an appointment) a participant in need of clinical family planning services to a Family PACT provider (either onsite, within your agency, or to an outside provider).
 - List the total number of CCG/I&E/MIP participants who *received* clinical family planning services from a Family PACT provider, by gender.
- Question 3.**
- List the total number of participants in all your CCG/I&E/MIP activities by age and gender, regardless of whether or not information about clinical family planning services was discussed. The number of participants should be consistent with the appropriate reporting form used by your project (i.e., I/O form or OSR Form).

What if I have more questions about the Clinical Linkage Activity Form?

If you have any additional questions, please contact your OFP Program Consultant.
